The SVUSD Facility Advisory Committee (FAC) includes parent representatives from each school in the district. The goal of the FAC has always been to have students assigned to schools in their neighborhood. In the past, this goal has not always been achievable due to impacted schools caused by rapid growth in the communities. At this time, several factors are allowing students to be assigned to their neighborhood schools. The most notable factor is declining enrollment. The second factor is the impact of the state fiscal crisis.

Due to declining enrollment and the decrease of state funding for bussing, the Executive Cabinet recognized the need to have the FAC evaluate and, if possible, make recommendations for non-contiguous and optional attendance areas to be assigned to neighborhood schools. The outcome from this process would assist with family transportation issues and also help identify possible future school closures. The FAC discussed critical factors when considering attendance area assignments from the parents' perspective.

The FAC discussed the importance of giving students who are currently enrolled the option to continue at their current school site. Siblings of District students who are currently enrolled in a school affected by an attendance area change have the option to be grandfathered into enrolling at that same school.

Siblings of current District students who would like to apply to a school that does not have a sibling currently attending will not be grandfathered in and must go through the School Choice process.

The following attendance area assignments were recommended to the Board of Education by the FAC to be implemented beginning with the 2010-2011 school year. If an attendance area is not listed below, the FAC did not recommend a change.

This information was presented to the Board of Education on January 12, 2010 and may take action on the February 9, 2010 Board Meeting.
