

THE TESTING / QUIZZING ENVIRONMENT

While any students have any testing materials or while the teacher deems the class a **testing environment**, the following standards must be adhered to or the student(s) involved will receive an Ethics Violation:

1. No talking or whispering to anyone until all students have turned in all testing materials and the teacher gives the class permission to speak.
2. Do not look at the testing materials of anyone else. Cover your answers completely.
3. All papers or anything with any content regarding the class must be put away inside notebooks and bags.
4. No phones, listening, communications or other electronic devices may be out (visible or usable) at all during the test unless allowed by the teacher.
5. Check for writing on your desk. If any writing is found on your desk during or after the test it will be assumed that you wrote it, so tell the teacher immediately before the test if you find writing on your desk that you did not put there.
6. The cover of all calculators must be taken off and put away (Math/Science Classes).
