## **Optional \$99 Heart Rhythm Screening (EKG)**

About 1 or 2 in every 100,000 young athletes experience sudden cardiac arrest each year. We're adding an electrocardiogram (EKG) to the standard pre-participation physical evaluation for Charger student-athletes. This may improve detection of heart abnormalities. Early detection can save your student-athletes life! Please let our clinic staff know you would be interested in adding this to your visit.

**GOOD LUCK THIS YEAR! GO CHARGERS!**
