

CTE-Frequently Asked Questions

What is CTE? Career Technical Education (CTE) is a program developed around industry sectors that integrate core academic and technical knowledge to provide students with a pathway to post-secondary education and careers. With California's investment in career pathways, it is a great time to build a bridge to the future through CTE. Students can explore careers in a variety of industries and begin to build technical and professional "soft skills" that prepares them to be both college and career ready. In these hands-on, project-based learning programs, students will build skills that are transferable to any career. Students in CTE courses have opportunities to connect with industry through guest speakers, field trips, competitions, and showcase events.

What is a CTE Pathway?

A CTE pathway is a sequence of 2 or more courses in the same industry sector. Students completing the pathway are equipped with technical and professional skills for career entry, or for continued education in a university/college after high school. Some singleton CTE courses are offered that are not in a pathway.

Can I change Pathways?

Once a student starts a pathway, it is recommended that they continue the sequence, but this is not required. To be a pathway completer, students need to finish at least two CTE courses in the same pathway, including the final capstone course. Students have the freedom to change pathways and take stand-alone electives for enrichment.

Can I take just the 1st year course?

Year 1 and Year 2 CTE courses can be taken as singleton courses. Some students find they want to explore multiple careers and take the year 1 course in different pathways, or often times there is no room in their schedule to take the advanced, completer course.

Can I get college credit for completing as CTE course?

Many CTE courses have an articulation agreement with a community college that recognizes the high school course as being equivalent to the college course. Graduates who enroll in community college may receive college credit for the high school articulated CTE course. Ask your counselor which colleges offer credit for articulated courses and how you can earn college credit when you enroll in the community college.

Why should I be a CTE pathway completer?

Graduates say they had more real-world opportunities in CTE courses. High school students who participate in CTE courses enter college and careers with the ability to be innovative, critical thinkers because they have learned to connect their core academic courses with transferable, professional skills.

Is CTE for college-bound students?

Yes, CTE is a great way to prepare for college by distinguishing yourself with skills that will transfer to any career. CTE pathway completers are also prepared for life after college because pathways connect academic learning to real-world applications.

Are CTE pathway courses UC a-g?

Most SVUSD CTE courses are approved for the UC-a-g designation. Over the last several years, UC has helped facilitate the development of courses that advance CTE knowledge while meeting the academic requirements for admission to California's public universities. 97% of SVUSD CTE courses meet UC a-g requirements and/or articulate with a local community college.

Can 9th grade students enroll in a CTE course?

Yes. CTE courses are available to ninth graders. Enrollment is dependent on whether there is room in your schedule during the period in which the course is taught. After school ROP courses are good options to explore a career and are available to students in grades 9 through 12.

Is CTE available in middle school?

Hands-on on career exploration courses are offered in Culinary, Engineering/Robotics, Digital Visual Media and TV/Video Production. Middle school is a good time to explore a career and to build skills that will help you in any career and in college. These skills include critical thinking, problem solving and working in teams to create a product.

What is an ROP course?

SVUSD partners with Coastline Regional Occupation Program (CROP) to offer CTE courses, in-bell, after school, and during the summer for students in grades 9-12. Many courses are UC a-g approved and internships are available. Visit the [Coastline ROP](#) to find out about all the possibilities to explore a career and get high school credit.
