

COMPUTER GRAPHICS

MISSION VIEJO HIGH SCHOOL

COURSE HIGHLIGHTS

- Gain technical skills required by the professional creative industry.
- Meet and acquire valuable insight from guest speaker designers from brands such as Volcom, Vans, and Roxy.
- Learn branding identity and design products such as skateboard and t-shirt graphic art.

COURSE DESCRIPTION

Explore the skills and professional methods used by graphic designers using industry-standard software to create digital graphics. Students will solve visual arts problems by implementing the expressive aspects of line, shape, value and form as well as learn the art of typography and color theory. Students will also apply artistic effects to digital photographs and art and put into practice artistic concepts in original graphic design works.

This course meets the **F** requirements for admission to UC and CSU
