

PRACTICAL APPLICATIONS IN AGRICULTURE

MISSION VIEJO HIGH SCHOOL

Develop your potential for premier leadership, personal growth and career success through agricultural education. Learn by doing!

COURSE HIGHLIGHTS

- Job shadowing
- Career training
- Career-based competitions
- Hands-on skill development
- Professional certifications
- Industry site visits

COURSE DESCRIPTION

Practical applications in agriculture provide Individualized instruction in various areas of the agriculture industry relevant to sales, services, and production. Students will research agricultural occupations and careers and receive hands-on training in various skilled positions in the area(s) of agriculture business and communications, animal science, plant science, horticulture, and floriculture through supervised field experiences.

Students will become knowledgeable of the many career opportunities available in agriculture, build proficiency in employability skills, understand agribusiness job safety regulations, and develop leadership skills. The class will also host guest speakers to present about career readiness as well as careers in the agriculture industry.

**Requires Agriculture Teacher Recommendation*
