

VETERINARY SCIENCE

MISSION VIEJO HIGH SCHOOL

Develop your potential for premier leadership, personal growth and career success through agricultural education. Learn by doing!

COURSE HIGHLIGHTS

- Demonstrations
- Lab experiments
- Career-based competitions
- Hands-on skill development
- Professional certifications
- Industry-standard career training

COURSE DESCRIPTION

Veterinary Science is an interactive course in which students become experts in veterinary knowledge and skills. This course takes an in-depth look into terminology, anatomy, physiology, animal nutrition, diseases, and common veterinary practices. Students will obtain the skills and knowledge needed to be current in veterinary medicine through structured lab experiences, hands-on applications, and professional industry visits. This course will provide students with the tools needed to be successful in the field of veterinary medicine.

**Prereq: Sustainable Agriculture Biology & Agriculture and Soil Chemistry*

This course meets the

G

requirements for admission to UC and CSU

To enroll or learn more about this course, contact your counselor or email Amanda Adams at adamasa@svusd.org or Cherie Shook at shookc@svusd.org.
